

To Whom it May Concern:

I would strongly recommend Matthew Foster as a candidate for employment. Matthew was employed as a Co-op at Fairchild where his education in programming and computer science was put to task re-developing the corporate Intranet and building custom applications.

As lead developer for Fairchild's Global Training and Development department I had the pleasure of working with Matthew on many tasks including a very important knowledge-base for factory engineers, where he was lead programmer. Matthew has good communication skills and is a competent programmer in PHP, JavaScript, CSS, HTML, MySql and much more. His true gift as a programmer is that he codes with clarity, forethought and a high level of future compatibility. He is a team player with a great work ethic and a can-do attitude that can complete tasks with little supervision.

Matthew would be a tremendous asset to any company and has my highest recommendation.

If you have any further questions in regards to his qualifications or employment at Fairchild, please do not hesitate to contact me.

Sincerely

Benjamin Duffy
